

Remarks

Claims 1-9 are in this application. Claims 4 and 6 have been amended to define that the filler is selected from polyglucin, rheoglucin, dextran and glucose. Support for this amendment is found in paragraph [0024] of the specification. Claim 5 is being amended to delete the second occurrence of the phrase the polyene antibiotic. Claim 7 is being amended to replace cytotoxic substance with polyene antibiotic. There is antecedent basis in claim 1 for the phrase the polyene antibiotic.

Paragraph [0008] has been amended to correct a clerical error to correctly refer to the Russian patent 2,065,307. This patent was cited in an Information Disclosure Statement filed previously in this application. The first page of US patent 2,065,307 is attached. It is clear the reference to US patent 2,065,307 which is for an electric flashlight is incorrect.

Applicants submit that the present application is condition for allowance and favorable consideration is respectfully requested.

Respectfully submitted,
